The rain falls from the sky. Water goes to the sea, rivers and the earth. The sun warms the sea and earth and the water becomes gas. It goes into the sky.This is called "evaporation". Then the water comes together to make clouds. This is called "condensation". The wind blows the clouds.When the clouds become very big this makes rain .The rain falls on the sea and earth and this is called percipitation. The water goes into the earth , rivers and the sea .This is called accumulation. Then the water cycle starts again.
